

## About the Construction Plan of the Universe

In Two Public Evening Presentations and an “Astroparticle Slam”, Astroparticle Physicists Inform about the Structure of the Universe and Latest Research

Recent research shed new light onto the universe. Elementary particles of highest-energy objects in the universe, such as black holes, supernova remnants, and active galactic nuclei allow conclusions to be drawn with respect to fascinating processes. Latest findings will now be presented during three cost-free public events. Citizens and journalists are cordially invited.

Astroparticle Slam, September 29, 2014

The Karlsruhe Institute of Technology (KIT) is a public corporation according to the legislation of the state of Baden-Württemberg. It fulfills the mission of a university and the mission of a national research center of the Helmholtz Association. Research activities focus on energy, the natural and built environment as well as on society and technology and cover the

**whole range extending from fundamental aspects to application. With about 9400 employees, including more than 6000 staff members in the science and education sector, and 24500 students, KIT is one of the biggest research and education institutions in Europe. Work of KIT is based on the knowledge triangle of research, teaching, and innovation.**
