Bridges to Studies: Orientation, Qualification, Support
Meeting of the MINT-Kolleg Baden-Württemberg on March 20 and 21, 2018

How does good teaching work at the beginning of the studies? This topic will be in the focus of the meeting of the MINT-Kolleg in March 2018. (Photo: MINT-Kolleg Baden-Württemberg)

How can the transition from school to university and the initial phase of studies be organized in terms of contents and structure? Which conditions are needed for a successful start and completion of studies? These questions will be discussed by representatives of universities from all over Germany at the meeting of the MINT-Kolleg Baden-Württemberg, an institution established by Karlsruhe Institute of Technology (KIT) and Stuttgart University, on March 20 and 21, 2018, in Stuttgart. The Minister of Science of Baden-Württemberg, Theresia Bauer, will open the meeting by her welcome address. Professor Horst Hippler, President of the German Rectors’ Conference, will make an introductory presentation.

Being “The Research University in the Helmholtz Association,” KIT creates and imparts knowledge for the society and the environment. It is the objective to make significant contributions to the global challenges in the fields of energy, mobility and information. For this, about 9,300 employees cooperate in a broad range of disciplines in natural sciences, engineering sciences, economics, and the humanities and social sciences. KIT prepares its 26,000 students for responsible tasks in society, industry, and science by offering research-based study programs. Innovation efforts at KIT build a bridge between important scientific findings and their application for the benefit of society, economic prosperity, and the preservation of our natural basis of life.

Since 2010, the KIT has been certified as a family-friendly university.
