**What do we need energy for? Is it possible to look through non-transparent objects? How is a skyscraper built, and what will a future vehicle look like? Answers to these and many other questions will be provided by the 2013 Children's University of Karlsruhe Institute of Technology (KIT). From August 2 to 22, children aged from eight to twelve may join a total of nine presentations, one opening fair, and a diploma celebration at the Audimax on KIT's Campus South and, thus, experience science and technology. From now on, tickets for the presentations and diploma celebration will be available.**
