

New Research Podcast "Selbstbewusste KI"

Experts Discuss Questions Relating to the Consciousness of Artificial Intelligence

"Selbstbewusste KI": Every Tuesday, this science podcast will focus on one aspect of whether artificial intelligence may develop consciousness. (Photo: Kai Mertens, KIT)

Artificial intelligence, AI for short, has long crossed the borders of science and engineering and is being discussed widely in society. Often, discussion focuses on the question whether AI can develop consciousness – and what this means to humans. Such questions will now be in the focus of the new science podcast "Selbstbewusste KI" (Self-conscious AI) of the research group "AI Consciousness" of Karlsruhe Institute of Technology (KIT). In twelve episodes and a final discussion addressing questions asked by listeners, experts from science and society will deal with this topic. The podcast will be issued every Tuesday.

global challenges in the fields of energy, mobility and information. For this, about 9,300 employees cooperate in a broad range of disciplines in natural sciences, engineering sciences, economics, and the humanities and social sciences. KIT prepares its 24,400 students for responsible tasks in society, industry, and science by offering research-based study programs. Innovation efforts at KIT build a bridge between important scientific findings and their application for the benefit of society, economic prosperity, and the preservation of our natural basis of life. KIT is one of the German universities of excellence.
