

KIT's Program for the Sustainability Days

ZUKUNFTSCAMPUS Staff Unit Offers Insight into Everyday's Sustainability at KIT

The solar park on Campus North of KIT generates sustainable energy to operate some of the large-scale research facilities. (Photo: Martin Lober/KIT)

Reduced consumption of resources is associated with many challenges for companies and institutions every day, examples being illumination, energy supply or waste management. Concrete efforts of researchers, service units, university groups or the city at KIT will be presented by the ZUKUNFTSCAMPUS in a lecture called "Facetten der Nachhaltigkeit" (facets of sustainability). This presentation will be made on Friday, June 12, 9.15 hrs, at the Kollegiengebäude der Mathematik on KIT Campus South (Englerstraße 2, room 014). The presentation (in German only) is part of KIT's program for the Sustainability Days 2015.

Technology; Information, Systems, Technologies – work on studies and the sustainable design of urban spaces from their disciplines' perspective and in an inter- and transdisciplinary manner.

Karlsruhe Institute of Technology (KIT) is a public corporation pursuing the tasks of a Baden-Wuerttemberg state university and of a national research center of the Helmholtz Association. The KIT mission combines the three core tasks of research, higher education, and innovation. With about 9,400 employees and 24,500 students, KIT is one of the big institutions of research and higher education in natural sciences and engineering in Europe.

Since 2010, the KIT has been certified as a family-friendly university.
