

## KIT at the City Hall: Super Accelerators in Focus

The KIT Center Elementary Particle and Astroparticle Physics (KCETA) Introduces Itself and Its Research to the Interested Public

*The Large Hadron Collider, LHC for short, at CERN in Geneva is the world's largest particle accelerator. (Photo: Markus Breig, KIT)*

**What do cosmic particle accelerators look like and what's new from the Large Hadron Collider (LHC)? These and other questions will be answered by scientists from the KIT Center Elementary Particle and Astroparticle Physics (KCETA) on Wednesday, January 23, 2019, at 6:30 pm. At the Karlsruhe City Hall, they present exciting research on the smallest building blocks of matter.**

**Being “The Research University in the Helmholtz Association,” KIT creates and imparts knowledge for the society and the environment. It is the objective to make significant contributions to the global challenges in the fields of energy, mobility and information. For this, about 9,300 employees cooperate in a broad range of disciplines in natural sciences, engineering sciences, economics, and the humanities and social sciences. KIT prepares its 25,500 students for responsible tasks in society, industry, and science by offering research-based study programs. Innovation efforts at KIT build a bridge between important scientific findings and their**
